ABOUT CINDERELLA ECO GROUP

Cinderella Eco Group is a family-owned company located in the north-western coastal community of Midsund in Romsdal, with deep roots in the beautiful Norwegian fjord-landscape. We have more than 20 years' experience with the Cinderella Incineration Toilet, a water-free, ecological solution for the management of toilet waste.

Until 2012, Cinderella Incineration Toilets were available in Scandinavia, mainly to the leisure home market. Today we also deliver internationally and to several sectors such as the aquaculture industry, crane manufacturers, railway companies, and mining and construction industries.

At Cinderella Eco Group, we believe in forward thinking and innovative design and we are committed to sustainability and the future of our environment. Toilet solutions that don't require water and sewage can contribute favorably to solving serious health and

environmental challenges worldwide. With the help of modern technology and our dedicated staff, we work to set the standard in first class toilet systems for both our customers and for a positive global impact.

Cinderella, the natural first choice for those who place high demands on quality and functionality.

CERTIFICATES AND APPROVALS

Cinderella Incineration Toilets are designed with the highest quality materials to meet the highest standards and reliability.

Our toilets have defined and set the standard for incinerating toilets for over 20 years and we work actively to ensure that incineration technology is recognized worldwide as an environmentally friendly, water-free, total waste handling solution.

Cinderella Incineration Toilets meet both national and international certifications and regulatory demands

and we work with a number of accredited companies to assure our customers that safety and quality are maintained at all times. Through careful analysis, Cinderella Eco Group has chosen the agencies that we believe have the best expertise and experience to provide a reliable and credible approval for our clients.

When nature calls

OUR COMMITMENT TO THE ENVIRONMENT

At Cinderella Eco Group, we focus on providing total ecological solutions for managing toilet waste. In a world where water scarcity and energy resources often define areas with high urbanization and population density, health challenges arise through poor sanitary conditions. We believe Cinderella's incinerating toilets can be an environmentally friendly alternative.

The United Nation's Sustainable Development Goals provide strong guidelines in key dimensions such as health, water supply and sanitation, innovation and responsible consumption, jobs and the conservation of life on earth and in the water. We are committed to

environmentally friendly measures that create good conditions for our environment, with good growth conditions and long-term economic viability.

By ensuring and developing environmentally friendly waste solutions that don't require water and which can be adapted to various needs, we meet many of the Sustainable Development Goals. Our incineration technology uses energy sources such as gas or electricity and the result of the process is bacteria-free ash that can be safely disposed of as ordinary household waste. Thus, we help limit our ecological footprint.

WHAT IS AN INCINERATION TOILET?

An incineration toilet is a water-free toilet where bio-waste products are burned at high temperatures to a minimum amount of ash, resulting in a teacup for four people after one week's use. The waste is safely incinerated in a closed incineration chamber, and the pollution-free gases from the incineration process are discharged through a separate exhaust pipe.

Incinerating toilets are a total waste solution, which means they get rid of all the waste. There are no additional processes or messy emptying routines, such as other toilet systems require. The solution is odorless and hygienic. The bacteria-free ash is completely free of all pathogens and can be emptied in the household waste.

Incineration toilets are a popular toilet alternative since they don't require water or expensive sewage hook-ups. With an incineration toilet it's possible to achieve almost the same toilet comfort as home, without the considerable costs associated with sewage systems.

Cinderella Incineration Toilets are the market leader in Europe and have been produced since 1999. All our toilets are manufactured in Norway to the highest quality and reliability standards. Our products are certified and approved according to current regulatory demands in each country we operate, which is a security for all our customers.

HIGHLIGHTS OF INCINERATION TOILETS:

-  No waste handling, only an insignificant quantity of ash to be emptied
-  High capacity 10 - 12 people per day
-  Water connection not required. Ventilation pipe is required.
-  Secure for children
-  Easy installation
-  For house and cabins
-  Electric model available
-  Requires little space
-  No odour

COMFORT

The market's most efficient and environmentally friendly incineration toilet

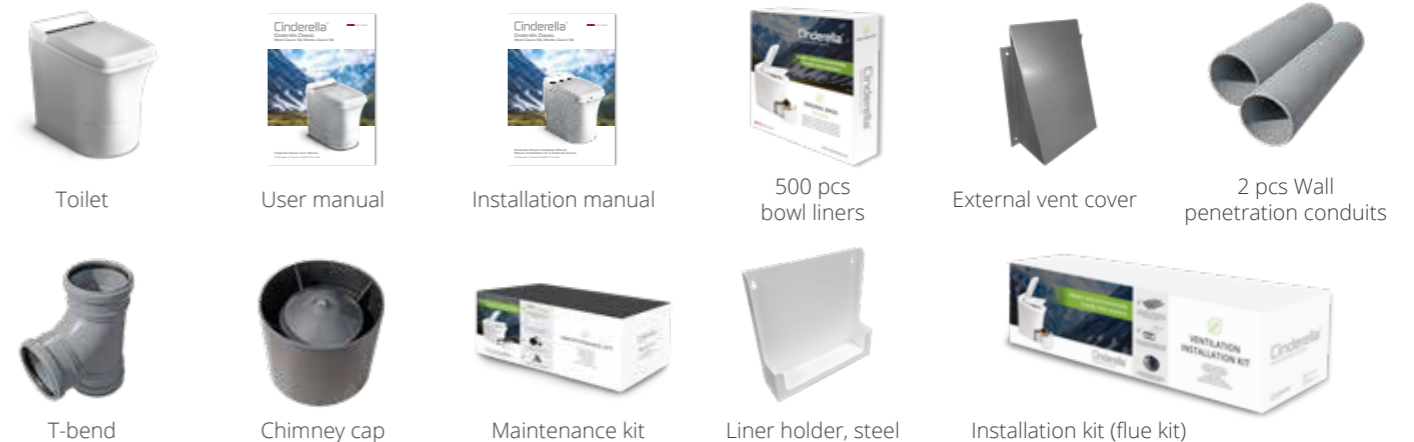

Our waterless incineration toilet Cinderella Comfort is Cinderella Eco Group's latest concept for cabins and holiday homes, renowned for its sustainable and environmentally friendly design and performance, with no polluting emissions. Comfort creates a comfortable indoor environment and provides approximately the same comfortable experience as you are used to at home. Cinderella Comfort comes with an LCD display that shows notifications and status at all times.

amount of ash. Four people using the toilet for a week will only produce about one teacup of ash. With Cinderella incineration toilets, you can avoid the major costs and strict regulations associated with connecting to the sewage system, and you can enjoy nearly the same comfort and convenience as at home. Since our toilets don't require a connection to water and sewage systems, they can be installed in vulnerable natural areas. Cinderella is a total sewage solution, in that it gets rid of all toilet waste. And, it doesn't have to be transported elsewhere, as required by other toilet systems.

Cinderella's incineration toilets incinerate urine and excrement at a high temperature, leaving only a small

URINAL

An odourless, waterless toilet

Cinderella Urinal is a waterless toilet solution specifically designed for urination. It is a perfect companion to Cinderella incineration toilets. The urine is discharged to a suitable receptacle such as a sand filter or a collection tank. The urinal is waterless and 100% odourless.

Cinderella Urinal is easy to install, and you can choose whether to run the drain pipe through the floor or wall. It uses a 50 mm drain pipe to a suitable receptacle. The urinal is mounted using screws or silicone. When

Cinderella Urinal is mounted and the drain pipes are connected, the toilet is ready for use.

Cinderella Urinal is a unisex model and is only used for urination. Cinderella Urinal is equipped with an odour barrier, preventing undesirable odours inside the toilet room. The solution does not require a barrier liquid, and is therefore always frostproof.

TECHNICAL DETAILS

- Weight:** 6 kg
- Height:** 460 mm
- Seat height:** 420 mm
- Width:** 341 mm
- Depth:** 500 mm
- Drain Pipe:** 50 mm
- Centre drain pipe from floor:** 72 mm

CINDERELLA URINAL

Cinderella Urinal is only a toilet for urination, and is a unisex model that can be used by both genders.

FEATURES URINAL

- Waterless urinal
- Unisex model, for both men and women
- Hygienic
- Frostproof
- Odour barrier to prevent odours
- Easy to install
- A high quality product made in Norway
- 3-year warranty

CLEANING AND MAINTENANCE

You clean the toilet like a normal toilet, but it is not recommended to use chemicals. You should use water only or water with biological green soap. You may want to polish the toilet bowl with car/boat wax (non-abrasive) to preserve the surface's fine finish and to prevent odours.

COMPLETE INSTALLATION

For a complete installation of the Urinal you will also need 50 mm drainpipes. This can be purchased at your local hardware store.

INSTALLATION AND USE

READ THE INSTALLATION MANUAL CAREFULLY

Cinderella incineration toilets are easy to install, and many of our customers elect to handle the installation themselves. Please study the installation manual delivered with the toilet, carefully, and make sure you have the necessary tools at hand to ensure a proper installation. If you are in doubt whether the installation can be done as described in the enclosed manuals, you should consult the dealer you bought the product from, or contact us, the manufacturer, directly.

4 MAIN STEPS TO PROPER INSTALLATION

1 SELECT A LOCATION

Cinderella is approved for use in wet rooms (IP34) and may be installed in rooms without heating. It is not necessary to attach the toilet to the floor. Air is supplied to the toilet through ventilation openings below the toilet. The foundation must be hard and level – not carpeted. Cinderella may be installed on a heated floor. There are no minimum distance requirements with regard to installation near flammable materials.

2 MAKE SURE THERE IS A GOOD SUPPLY OF FRESH AIR

A good supply of fresh air to the toilet room is important to ensure good air supply to the toilet unit. Air supply can be through an air vent (the vent must be well dimensioned (at least \varnothing 160mm / 201cm²)) and/or by an inlet air pipe through the outer wall into the toilet.

3 INSTALL THE VENTILATION OUTLET PIPE, VERTICAL PIPE AND CHIMNEY TOP

Ventilation pipes may be installed in several ways, depending on whether you are feeding them through the wall or directly up through the roof. The ideal installation is to go straight up from the T-bend, without bend, and ending up above a roof where the ventilation fan will be assisted by the chimney effect.

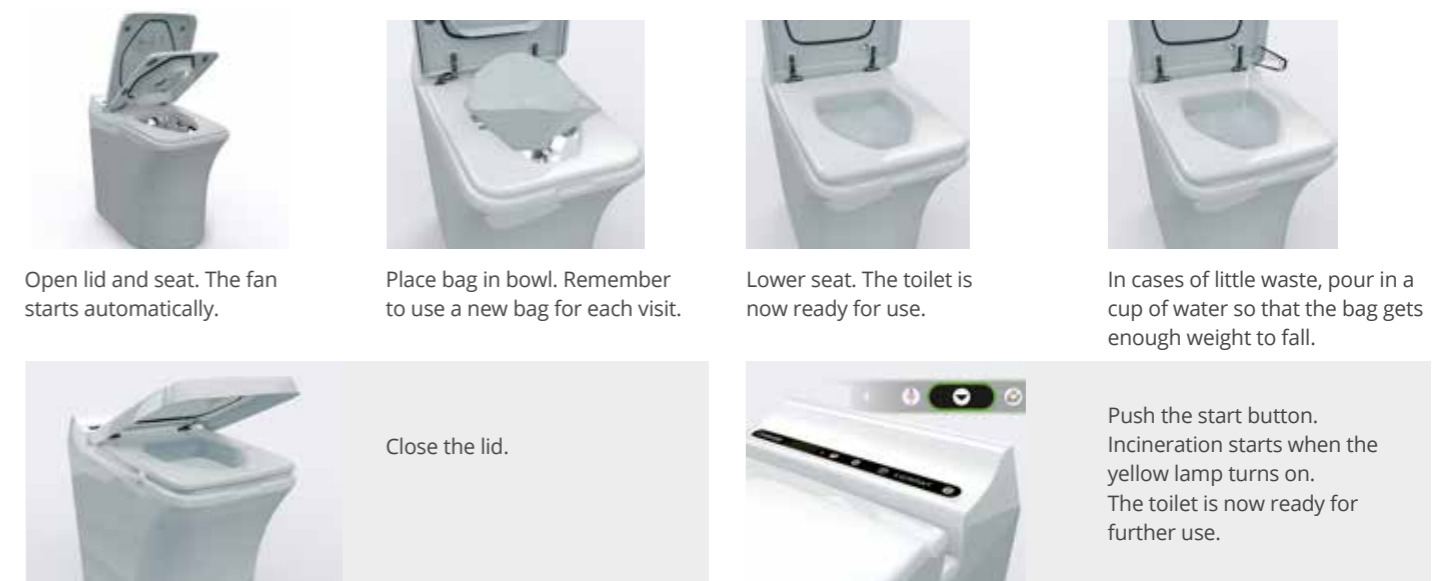

4 CONNECT THE TOILET TO A POWER SUPPLY AND THE VENTILATION PIPE

Connect the toilet to the mains supply by plugging the power cable into an earthed wall socket (at least 10A).
