

MODERN AND ENVIRONMENTALLY FRIENDLY TOILET SOLUTIONS

AUS

2023

For stationary structures • For health, industry and emergency relief

When nature calls

When nature calls, it's good to know that civilization is near.

Cinderella's incineration toilets are world-class.

They do not require water. They are odourless and environmentally friendly. No handling of waste, only an insignificant quantity of ash remains.

SUSTAINABLE WATER FREE SANITATION – FOR OVER 25 YEARS

Cinderella Eco Group is a family owned company located in Midsund, Molde municipality, with deep roots in the beautiful Norwegian fjord landscape.

The company is part of Sjøvik Group, which has operated from Sjøvika in Midsund since 1903. Odd Kjell Sjøvik, chairman, grandson of Sjøvik's founder and father of the current CEO of Cinderella Eco Group, developed the prototype and launched the adventure, first with production in Sweden and shortly after from Norway, in the municipality of Lyngen above the Arctic Circle. Here we produce every toilet we sell from this location and in 2022 we opened a brand new factory on the neighboring plot. More than 25 years ago, the first Cinderella incineration toilet saw the light of day and the demand for our water-free, ecological, non-sewered sanitation solutions has spread internationally with 60 % of our production for export markets. We're proud to say that all of our toilets are Made in Norway.

Until 2012, Cinderella incineration toilets were only available in the Nordic area, mainly to the leisure market and cottage owners. Today, we have a presence on all continents, not only for the private sector but for professional sectors such as aquaculture, crane manufacturers, railway companies, the mining and construction industries

New factory in Lyngen, above the Arctic Circle.

and to relief organizations. With our model adapted for transportation such as narrow boats, caravans and motor homes, we have also created an innovative solution for those who want toilet comfort while on the go. At Cinderella Eco Group, we believe in creativity and innovative design and we are concerned about sustainability and our environment. Toilet solutions that do not need water and sewage can provide answers to the serious challenges to health and to our society. With the help of modern technology and committed employees, we set the standard for the optimal trade in first-class toilet systems both for our customers and to be able to make a difference on a global scale.

Cinderella is the natural choice for those who place high demands on quality and functionality – **when nature calls.**

OUR COMMITMENT TO OUR ENVIRONMENT AND OUR SOCIETY

At Cinderella Eco Group we design ecological solutions for the total management of toilet waste. In a world where water shortages and energy resources characterize areas with strong urbanization and population density, health challenges arise through failing or lacking sanitation. This is where Cinderella's incineration toilets can be an environmentally friendly alternative.

The UN's Sustainable Development Goals provide guidelines to important dimensions such as health, access to water and sanitation, innovation and responsible consumption, education and job creation as well as the preservation of life on earth and in water. Through our corporate social responsibility for the non-profit organization North South Partnership Aid, we are committed to contributing to the future of orphaned

and vulnerable children in Kenya and Ethiopia. We donate our water-free incineration toilets to children's villages that need safe sanitation, contributing to ensuring that precious water resources are used exclusively for hygiene, drinking and agriculture, not for flushing.

At Cinderella, we develop environmentally friendly waste solutions that do not require access to water and can be adapted to different needs. Our incineration technology uses energy sources such as LPG gas or electricity and where electricity can be harnessed from wind power or solar. The result of the process is only a minimal amount of bacteria-free ash that can be safely disposed of in ordinary household waste bins. In this way, we help to limit our ecological footprint, without the consumption of precious resources and without infectious or polluting emissions.

CERTIFICATES AND APPROVALS

Cinderella Incineration Toilets are designed with the highest quality materials to meet the highest standards and operational reliability.

Our toilets have defined and set the standard for incinerating toilets since 1997 and we work actively to ensure that incineration technology is recognized worldwide as an environmentally friendly, water-free, total waste handling solution.

Cinderella Incineration Toilets meet both national and international certifications and regulatory demands and we work with a number of accredited companies to assure our customers that safety and quality are maintained at all times. Through careful analysis, Cinderella Eco Group has chosen the agencies and

testing laboratories that we believe have the best expertise and experience to provide a reliable and credible approval for our clients.

WHAT IS AN INCINERATION TOILET?

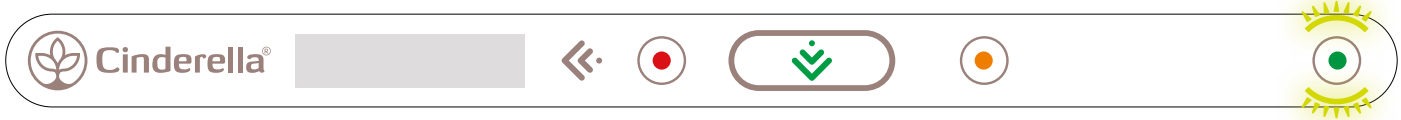

An incineration toilet is a water free toilet where bio waste products are burned at high temperatures to a minimum amount of ash, resulting in a teacup for four people after one week's use. The waste is safely incinerated in a closed incineration chamber, and the pollution-free gases from the incineration process are discharged through a separate exhaust pipe.

Incinerating toilets are a total waste solution, which means they get rid of all waste. There are no additional processes or messy emptying routines, such as other toilet systems require. The solution is odorless and hygienic. The bacteria-free ash is completely free of all pathogens and can be discarded

with the household garbage. Incineration toilets are a popular toilet alternative since they don't require water or expensive sewage connection. With an incineration toilet it's possible to achieve almost the same toilet comfort as flush toilets, without the considerable costs associated with sewage systems.

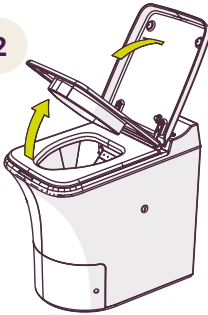

Cinderella Incineration Toilets are the market leader in Europe and have been produced since 1997. All our toilets are manufactured in Norway to the highest quality and reliability standards. Our products are certified and approved according to current regulatory demands in each country we operate, which is a security for all our customers.

HOW TO USE AN INCINERATION TOILET

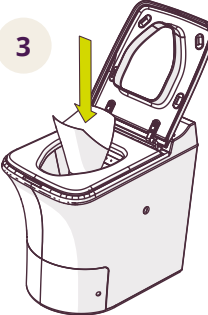

- 1

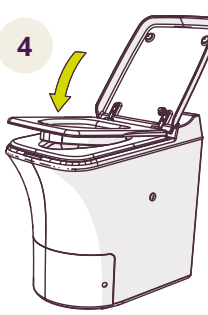

Check that the green light on the control panel is lit, indicating the unit is powered and ready for use.
- 2

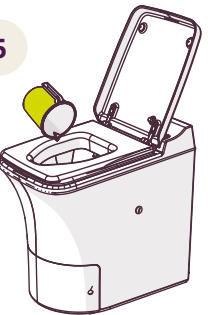

Lift the toilet lid and seat. A red light starts flashing. The ventilation fan starts.
- 3

Place a bowl liner in the bowl. Use a new bowl liner for every visit.
- 4

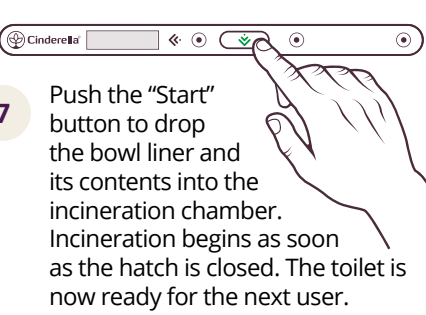

Lower the seat. The toilet is ready for use.
- 5

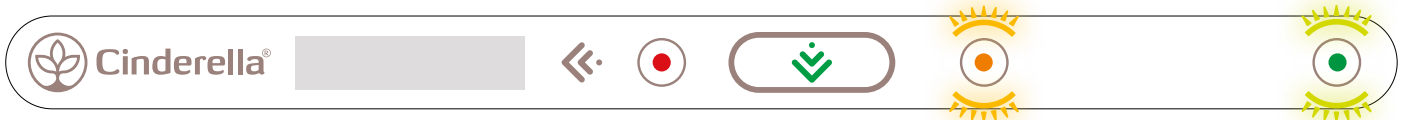

Use the toilet as usual. If little waste is produced, it may be helpful to pour some water into the bowl to add weight.
- 6

Close the toilet lid.
- 7

Push the "Start" button to drop the bowl liner and its contents into the incineration chamber. Incineration begins as soon as the hatch is closed. The toilet is now ready for the next user.

- 8

A constant yellow light will display during active incineration. The toilet may be used at any point. This will temporarily interrupt incineration. Incineration time may vary.

«My Cinderella» advice tailored to your product

OPTIMAL INSTALLATION - SPECIALLY ADAPTED TO YOUR CINDERELLA

Installing a Cinderella is easy and requires no external tanks or the use of water and sewage. An ventilation system for air in / out must be installed, and it is important that this is done in accordance with our recommendations for good operational reliability and longevity.

The toilet's most important prerequisite for satisfactory performance is correct installation. With our original installation packages, you are ensured the best conditions for success. In 2022 we launched model-adapted installation packages that contain everything you need for an optimal installation. This will not only contribute to making it easy for you, but it will also assist you in installing your toilet according to our recommendations.

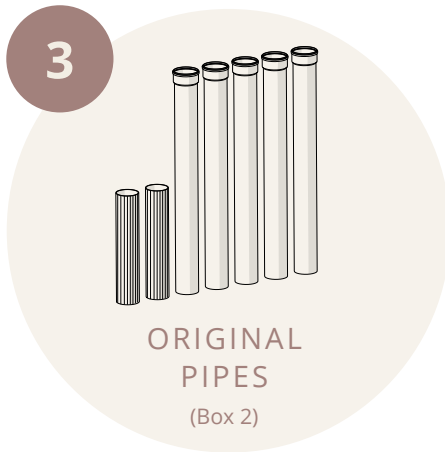

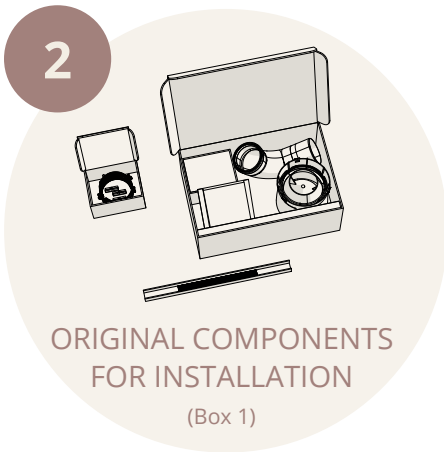

**) Optimal installation is an installation without extra bends on the exhaust pipe. If you need bends beyond what is included in the installation package, they can be purchased from our dealers. Please refer to the installation manual for alternative installations for your product.*

WHAT DO I NEED IN ORDER TO INSTALL CORRECTLY?

The packaging containing our toilets contains a product manual and a box of original bowl liners (1).

We have packed the toilet unit, original model-adapted components and pipes in 3 different boxes. You will need all 3 in order to install your toilet successfully. Read more about our installation packages under each product or under "Accessories for your incineration toilet" on page 20.

The example above shows Cinderella Comfort and the contents of the Cinderella Comfort original installation package complete.

KEY COMPONENTS IN OUR ACCESSORY KITS AND INSTALLATION PACKAGES

We have upgraded several of the components in our installation packages. The chimney flue cap is new as of 2022 and is available in every accessory kit for every model.

Our new, heat resistant pipes for Cinderella Comfort are optimized for ventilation, and UV-stabilized to avoid color fading over time. The flue cowl is important for optimal incineration and helps to keep the flue pipe free of twigs, leaves and other debris. Our new cowl has a streamlined design and is available in black to match our new pipes.

Cinderella Freedom is also available with model-adapted components and are required to be installed with certified and approved flue pipes. Read more on page 20.

NEW, IMPROVED FLUE COWL
Streamlined design and better airflow in the pipe

UV-STABILIZED PIPES
Black, matte color that will not fade over time.
Optimized for ventilation.

BEND W / CONDENSATION CONNECTOR
Better airflow, easier installation and
cleaning. The option to connect a
condensation trap (indoors).

CONDENSATION TRAP
Condensation trap for installation on an indoor
pipe. Sold as a separate accessory.

The example shows the installation of Cinderella Comfort

ENERGY SOURCE
LPG GAS

Freedom

LPG-POWERED
INCINERATION TOILET

Cinderella Freedom is our LPG-powered, water free incineration toilet that incinerates all toilet waste at high temperatures, producing a minimal amount of sterile ash. It is specially adapted for areas with limited or no access to electricity, and perfect for off-grid living. As with all toilets from Cinderella Eco Group, the Cinderella Freedom doesn't require water or sewage, thus saving costly sewage connections and allowing for a sustainable lifestyle. The toilet comes with an easy-to-use LCD display, which provides notifications and alerts when the ash container is full and should be emptied.

Cinderella Freedom is based on the same high quality that characterizes the Comfort model but uses LPG gas instead of electricity to power the incineration process. This means that the Cinderella Freedom Incineration Toilet may be used in all areas where gas is preferred and areas without electric mains power. It only requires 12VDC to run the control panel and ventilation fan.

-  Cottages, leisure homes, sheds, Granny Flats and Tiny Homes
-  Energy source: LPG gas
-  Capacity: 4 visits per hour

ENERGY SOURCE LPG GAS

- LPG powered incineration toilet
- No water, no sewage
- Made in Norway
- 3-year warranty

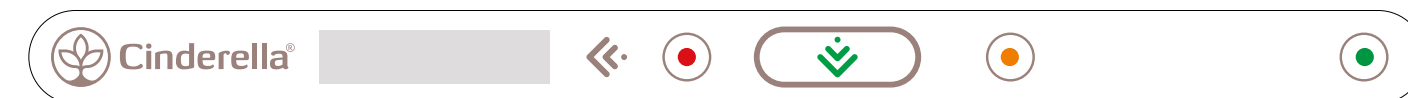

CINDERELLA FREEDOM INCINERATION TOILET

For prices contact
your local dealer

WHY CHOOSE FREEDOM?

DOES NOT REQUIRE ACCESS TO ELECTRICITY

Cinderella Freedom does not require electricity but uses LPG gas as an energy source instead of electricity to conduct the incineration process. This makes Freedom perfect for off grid installations.

LCD DISPLAY

Cinderella Freedom comes with an information display that shows you the status and other notifications. The display notifies you when the ash container needs to be emptied, in addition to signal lights and sound notifications. The display can be set to 7 different languages.

INSTALLING CINDERELLA FREEDOM

A qualified plumber / gas fitter must install Cinderella Freedom. Always make sure that the work is conducted by professionals. We recommend you consult your dealer for assistance to calculate the length of the horizontal and vertical pipe sections in accordance with local regulations.

TIP!

TECHNICAL SPECIFICATIONS:

- Height: 600 mm / Seated height: 540 mm
- Width: 390 mm
- Depth: 590 mm (adapter 698mm)
- Weight: 34 kg / Max weight tolerance: Up to 200 kg
- Capacity: 3-4 visits per hour
- Ventilation outlet: 110 mm
- Gas consumption: 9.8 MJ/h
- Inlet gas pressure: 2.75 kPa
- Gas type: LPG
- Power requirements: 12V DC 11-14.4V, 4 Amp (current)
- Standby Power Consumption: 0.09 Amp
- Power consumption (incineration): 1.3 A

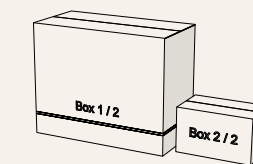

OTHER FEATURES FREEDOM:

- Perfect for areas where gas is preferred or where no mains power is available
- 230V mains power not required
- Requires 12V DC, LPG gas supply, and inlet/outlet air
- A high quality product made in Norway
- Easy to use
- Informative LCD display
- Simple emptying of ash container
- Reliable operation
- No odors

THIS IS INCLUDED WITH THE FREEDOM:

Box 1/2

- Cinderella Freedom Incineration Toilet
- Cinderella original bowl liners (100 pcs)
- Product manual
- Vent duct
- Gas fittings
- Docking station
- Screws

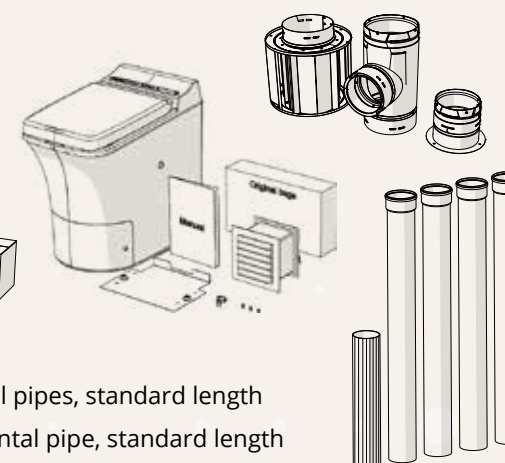

Box 2/2

- Flue cowl
- Reduction tee 5x4"
- Cinderella adapter

Flue pipes

- 4 vertical pipes, standard length
- 1 horizontal pipe, standard length

YOU ALSO NEED:

A standard kit of compliant metal flue pipes is included with the Freedom model. If you need additional pipes, we recommend you consult your dealer.

ENERGY SOURCE
ELECTRICITY

Comfort

THE MARKET'S MOST EFFICIENT
AND ENVIRONMENTALLY FRIENDLY
INCINERATION TOILET

Our water free incineration toilet Cinderella Comfort is Cinderella Eco Group's latest concept for cabins and holiday homes, renowned for its sustainable and environmentally friendly design and performance, with no polluting emissions. Comfort comes with a closed air system, which creates a better indoor environment and doesn't affect the temperature of the room where the toilet is installed. Cinderella Comfort also comes with an LCD display that shows notifications and status at all times.

We named this model "Comfort" because it provides a safe, comfortable and user-friendly experience compared to other incineration toilets on the market. The Comfort has a closed air system where fresh air for the incineration process is supplied via a separate air pipe, which provides a significantly better indoor climate. This prevents the room temperature from dropping and avoids conflicts with other air-dependent installations such as kitchen ventilation fans, fireplaces and wood-burning stoves.

-  Cottages, leisure homes, sheds, Granny Flats and Tiny Homes
-  Energy source: electricity
-  Capacity: 4 visits per hour

your local dealer

- Complete waste handling solution, incinerates all waste
- No water, no sewage
- Made in Norway
- 3-year warranty

WHY CHOOSE COMFORT?

CERTIFIED PRODUCT

Cinderella Comfort is tested and approved in accordance to all applicable ACMA regulatory arrangements, including all technical and record-keeping requirements.

LCD DISPLAY

Cinderella Comfort comes with an information display that shows you the status and other notifications. The display notifies you when the ash container needs to be emptied, in addition to signal lights and sound notifications. The display can be set to 7 different languages.

INSTALLING CINDERELLA COMFORT

The most important prerequisite for a well-functioning toilet is correct installation. Cinderella incineration toilets are easy to install, and many of our customers manage the installation of the toilet themselves. It is important that you familiarize yourself well with our recommendations for installation in the manual provided with the toilet and have the necessary tools available for a correct installation.

Water-free

Unisex model

CINDERELLA URINAL

For prices contact
your local dealer

AN ODORLESS TOILET SOLUTION WITHOUT USING WATER

The Cinderella Urinal is a water-free toilet solution that is intended for urination only (toilet paper must be disposed of separately). It is very suitable as an additional toilet for Cinderella incineration toilets. The urine is fed through a drain to a suitable receptacle, such as a sand filter or a collection tank. The urinal is used completely without water and is 100 % odorless.

Cinderella Urinal is easy to install, and you can choose whether the drainpipe should go through the floor or wall. A 50 mm drainpipe is used to lead the urine to a suitable receptacle. The urinal is attached to the substrate with screws or by using silicone. Once the Cinderella Urinal is installed and the drainpipe to the receptacle is connected, the urinal is ready for use.

Cinderella Urinal is a unisex model that can be used by all genders and is reserved for urination only. It is equipped with a membrane odor barrier, which prevents odors. The solution does not require barrier fluid or water to work and is therefore always frost-free.

CLEANING AND MAINTENANCE

You clean the toilet like a normal toilet, but it is not recommended to use chemicals. You should use water only or water with biological green soap. You may want to polish the toilet bowl with car/boat wax (non-abrasive) to preserve the surface's fine finish and to prevent odours.

TECHNICAL SPECIFICATIONS:

- Height: 460 mm
- Seat height: 420 mm
- Width: 340 mm
- Depth: 500 mm
- Weight: 6 kg
- Drain Pipe: 50 mm
- Centre drain pipe from floor: 54 mm

Cinderella Urinal is only a toilet for urination, and is a unisex model that can be used by both genders.

OTHER FEATURES URINAL:

- Waterless urinal
- Hygienic
- Unisex model, for both men and women
- Frost proof
- Odour barrier to prevent odours
- A high quality product made in Norway
- Easy to install
- 3-year warranty

THIS IS INCLUDED WITH THE URINAL:

- Cinderella Urinal
- Installation manual
- Odor seal with drain
- Tools for assembly
- Filter with sleeve

YOU ALSO NEED:

For a complete installation of the Urinal you will also need 50 mm drainpipes. This can be purchased at your local hardware store.

ODOUR BARRIER:

Cinderella Urinal is equipped with an odour barrier, preventing undesirable odours inside the toilet room.

ACCESSORIES FOR YOUR INCINERATION TOILET

CINDERELLA COMFORT ORIGINAL INSTALLATION KIT COMPLETE

This installation kit contains everything you need for an optimal installation of your Cinderella Comfort Incineration Toilet:
1 x Wind Shield, 1 x Flue Cowl, 1 x Inlet air vent, 1 x Elbow 87 degrees, 3 x Pipe clamps/fasteners, 2 x Pipes 500 mm,
